Should you have any queries with the deadlines or mechanical specifications please contact the production department on: +44 (0)1273 467579 or email: toni.barrington@31.media.co.uk

"TEST magazine is not just about testing, it's but also our community. Perfect for a Maverick Tester."

Anne-Marie Charrett, Industry Guru

"I've enjoyed what I have seen so far with T.E.S.T. In such a fast moving industry it is good to have new and fresh approaches to testing security boundaries, I will be following T.E.S.T in the future."

Richard Brain – Technical Director, ProCheckUp

"I found T.E.S.T magazine very good for targeting the decision makers within the testing community"

Rick Jonsson – Business Development Manager, TechExcel

Advertising Mechanical Data

Artwork submission: We can accept Print Compliant PDF or 300dpi JPG files with 3mm bleed and trims marks included. Please do not supply Photoshop-saved PDF files. PDFs need to be exported using Acrobat Professional. This will optimise the file as well as correctly embed font and image information. To ensure artwork is as you expect when it goes to print please supply a low resolution converted JPG file for us to view from the PDF or submit a digital full colour proof (inkjet or digital). We can only attempt colour matching by supplying a proof using approved proofing systems such as Chromalin.

Artwork can be accepted on CD, FTP (details available), and by email. If submitting by FTP please contact us so we know it's there for collection. Please do not send artwork by email if the file size is larger than 6Mb. We will need to 'accept' to allow us to receive your file.

Artwork creator notes: Please name files: 'Your company name with T.E.S.T and Month. For example 'Blue Chip Customer 0112.pdf'.

Please ensure all work is completed using the CMYK colour model (not RGB). Images should be worked at 300dpi at the intended size. If elements have been created in Illustrator or Freehand, please ensure all fonts have been converted to outlines or paths. Files should not to contain any TrueType fonts or use the 'bold, italic or outline' facilities in the tool bar to override font styles. Always use the actual font styles. You are responsible for overprinting and trapping. The RIP will set standard trapping. No ICC profiles to be used on images or files. White-out type should be a minimum of 6pt in size and medium in weight. To obtain a heavy black we recommend the following colour value: 50C, 50M, 50Y, 100K. The minimum rule width is 0.5pt.

If submitting more than one advert, please ensure you supply separate single-page files and not multiple adverts in one PDF.

Double-page spreads should be submitted as a spread but allow 14mm in the centre for the gutter. The magazine is perfect bound.
